

TRUCK BODY KIT FOR CURTAINSIDER

EXHIBIT: mounted truck body KIT with fixed tarpaulin roof, cranked (semi-trailer) front-wall (pillars galvanized steel and quick release on the right side). Manual pillar lifting system, rear portal with different hinge options (mono- or double-joint) and door latches (below or integrated), drop side with integrated lashing rail – built on our TSE-subframe.

- Code XL certification for 12, 14 or 18 t payload (semi-trailer 27 t) as well as for beverage (VDI 2700), tires and DE9.5 - deviating body KITS w/o certification or for special projects always possible
- Secure your load by using integrated lashing rails in front wall, drop sides or floor ex-factory
- Choose between 2 different sliding - and 4 different fixed roof systems - also with and for full tarpaulin
- Central lifting system or manual lifting device integrated into pillar - easy to load thanks to option of a 400 mm lifted roof
- Curtainsider (tarpaulin as option) also as “battenless” w/o middle pillars or including micro-sliding pillars (Quickcurtainsider) or including drop sides (400 to 1,000 mm)
- Front wall options for semi-trailer (cranked) or ‘straight’ for clear side loading into truck and trailer
- Rear portals with aluminum or steel pillars and standard doors or load-through portal with split doorwings and optional link bridge or special pillars to integrate tail lifts
- Subframe with tie-down rings (2,000 kN) and compatible header options with standardized bore holes - longitudinal beams 80 to 180 mm height
- Surface anodized aluminum and galvanized steel - as option we offer a high-quality powder coating ex-factory within the full RAL-color range
- Known for our reliability, our high quality and ‘true to size’ parts guarantee mounting our KIT including subframe within 8 hours (2 people)
